# Welcome to Our Universe

A universe is just an illusion until someone describes it for the first time. In his most famous novel, Carl Sagan discusses the origin of life, the evolution of galaxies, space missions and the death of the sun.

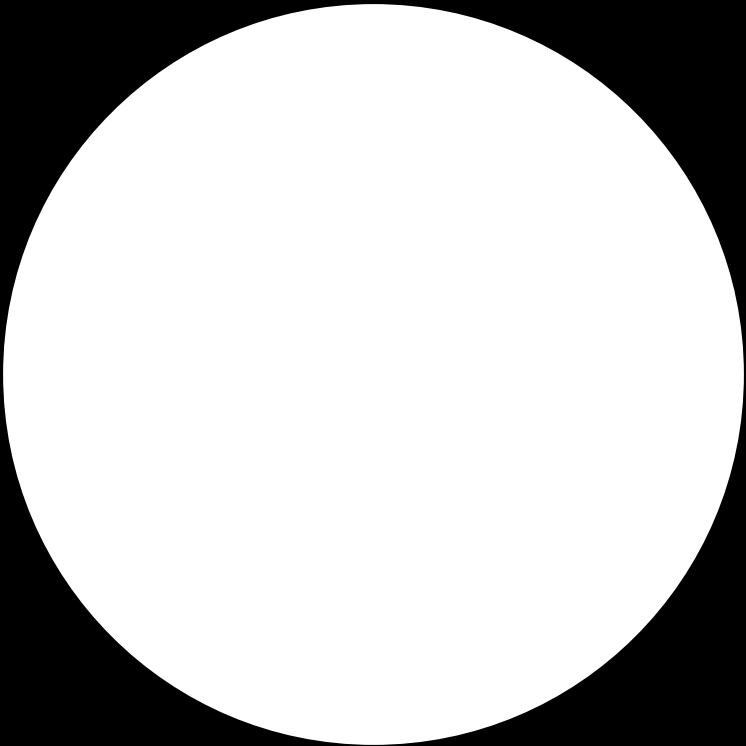

**Join us on this incredible journey through our universe, which is also your universe.**

# The Origin of Everything

93 billion light-years: that's how big the universe is, everyone's universe. However, our universe is immeasurable. It could be an office block, a house in the mountains, the terrace of a bar, or a 3-year-old's bedroom. Because, how big is your world? Your life. Your happiness. Your dreams. We can't measure it, and we don't want to. The most important thing is that you let us be a part of it, because to us, your world is our only universe.

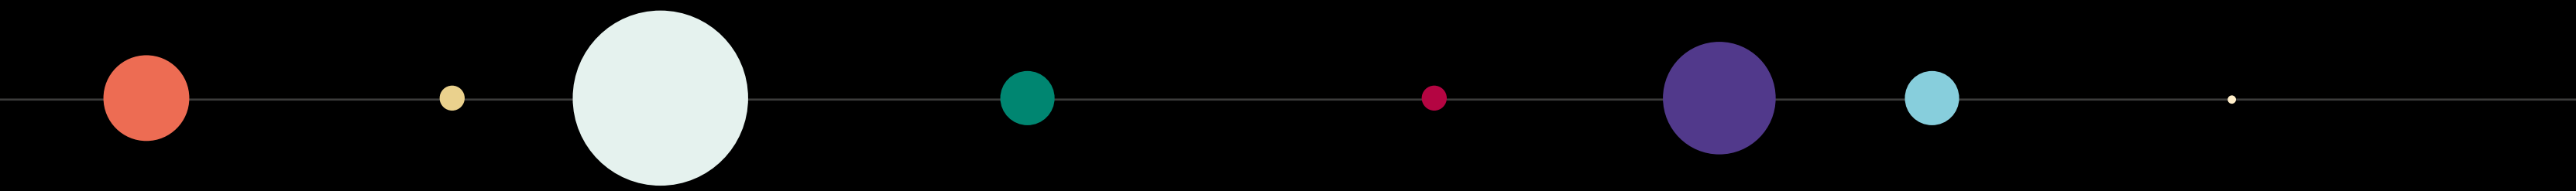

Your World

Our Universe

# What Does Your World, Our Universe Mean?

To you  
employee

We exist thanks to you. That's why we want to stay by your side, offering you a place to grow both personally and professionally, a place that you feel proud every time someone asks you where you work.

To you  
distributor/installer

Thank you for helping us to make the universe we share grow a little bit more every day. Thank you for continuing to count on us, just like we count on you, providing you with a wide range of solutions so that you can choose the best one for your customers.

To you  
prescriber

A universe doesn't exist until someone discovers it. You, through your work, help us to build lasting relationships, so that more and more people count on us. Innovating processes and developing quality products with high added value is our way of saying thank you.

To you  
customer

Your world is that place you wish you could stay and live. In our opinion, there is nothing more valuable. Because if you let us into your home, your business or your company, we will provide you with an almost infinite universe of possibilities.

A man with a beard and glasses, wearing a dark blue t-shirt, is sitting on a grey sofa and reading a book. A woman with long brown hair, wearing a light pink t-shirt, is sitting next to him, leaning back on a teal cushion and smiling. The background features large windows with white vertical blinds and a floor lamp with a warm orange glow. The text "We make people's lives easier" is overlaid on the right side of the image.

We make people's  
lives easier

# An Almost Infinite Universe of Possibilities

At Saxun we have a clear purpose:  
to contribute to people’s well-being and  
happiness by providing solutions that  
improve the spaces in their lives.

We are pioneers in offering the widest and most varied  
range of solar protection systems, enclosures and décor on  
the market.

So, we are not exaggerating when we say that we have an  
infinite universe of solutions to offer you, to turn your home  
or your business into your favourite space.

# Awnings

Light and sun are part of our essence and way of being but having a little control over them is often helpful too. In a residential environment, awnings can be a fantastic idea. Its hinged mechanism makes for total protection and its fabric can be easily rolled up for quick, safe and easy storage. Easy to install, parasols are also a great solution for homes, restaurants and cafés.

Awnings

# Pergolas

Making spaces a place where anyone would want to stay and live is a goal everyone should strive for. Pergolas are a great tool to help achieve that pleasant environment with an ideal temperature where you want to spend time. And if you want to go a step further in your hotel, restaurant, café or shop, the bioclimatic pergola is a whole other world.

When it comes to your home, it is important to remember the façade, because it is a way of presenting yourself to the world. Majorcan shutters are a great choice if you are looking for beauty and elegance, while allowing you to control the entry of light, noise and outside temperature. Louvers, on the other hand, are a great ally for energy saving, sustainability and the greenhouse effect. Being responsible gives your surroundings an unquestionable aesthetic value.

Solid Shutters  
and Rolling  
Shutters

3\_ An Almost Infinite Universe of Possibilities

Windows provide a way of communicating with the outside world, and that is wonderful. However, it is through them that cold enters in winter and heat in summer. Therefore, choosing the right shutters is something you should take the time to do so that you don't waste any energy and you make your home as pleasant as possible.

Solid Shutters and  
Rolling Shutters

The fact that we are strong defenders of the environment does not mean that we are not human beings. And it goes without saying that no one likes seeing uninvited mosquitoes and other insects in their home. As well as providing protection, the designs and finishes of our mosquito screen meet the high standards of excellence in everything we do.

3\_An Almost Infinite Universe of Possibilities

Mosquito Screen

# Curtains and Blinds

Curtains and blinds allow you to enjoy your favourite space with total privacy, regulate the entry of natural light and contribute to energy saving. Many of them are consolidated models and very popular among our customers: Roller blinds, Vision, Stor Glass or the Vertical and Pleated curtains.

Curtains and Blinds

State-of-the-art designs and high functionality characterise our curtain and blind models, all of which can be motorised and automated, meeting the demands of top-level professional environments and turning your rooms into versatile spaces that you can enjoy all year round.

3\_An Almost Infinite Universe of Possibilities

Curtains and Blinds

# Alicantina Shutters and PVC Curtains

Respect for tradition and origins is part of our way of being. Our Alicantina Shutters are an example of this. They were the pioneers and have survived until today with all the freshness and performance expected. They regulate the sunlight, cast shade on doors and windows, let air pass through, repel the rain and withstand the elements. Moreover, they fit in with all styles.

and PVC Curtains

# Garage and Shop Doors

Our garage and shop doors allow you to live with peace of mind, knowing that what is important to you is protected, that the ideal temperature of an environment is preserved, and that you have space both inside and out. These doors are resistant, have a spectacular design and their materials make them a thermal and acoustic insulator. After all, no amount of care is enough to protect what is most important to us.

Garage and Shop Doors

# Folding Doors and Ceiling Covers

## 3\_An Almost Infinite Universe of Possibilities

If you are looking to create two separate spaces, folding doors could be the solution because they adapt to any place: living rooms, flats, kitchens, commercial premises but also to more specific spaces such as caravans, for example. Our ceiling covers are a unique, aesthetic and practical resource that allows for incredible finishes both indoors and outdoors.

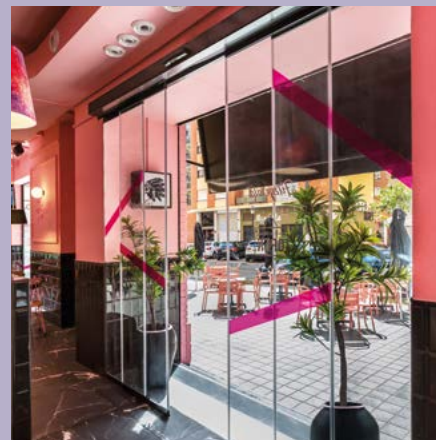

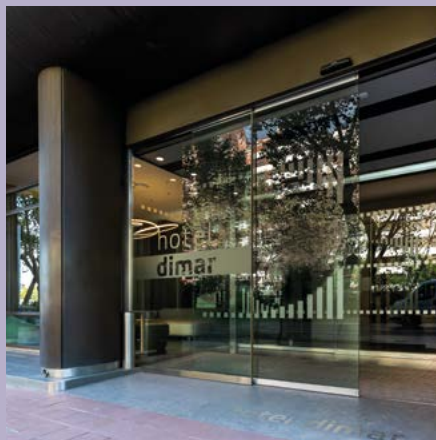

Folding Doors  
and Ceiling Covers

# Automatic Glass Doors

Automatic glass doors are a step forward in the history of our brand. Nowadays, we need faster, more precise and functional access in all areas: home, work and leisure. The advanced technology of our automatic doors makes them perfect for any sector or architectural project, providing all the necessary security and allowing smart use of the building.

3\_An Almost Infinite Universe of Possibilities

Automatic Glass Doors

# Smart Home

Motorisation and Automation

3\_An Almost Infinite Universe of Possibilities

A smart space is one that is thought out, designed and executed using smart technology. Our products support motorisation and home automation systems that offer you endless alternatives to optimise the performance of blinds, curtains, awnings, shutters and pergolas. You can control the temperature inside your home via your smartphone, create pre-configured scenarios and use sensors to protect the space depending on the weather. Amazing, right?

# Glass Curtains

### 3\_An Almost Infinite Universe of Possibilities

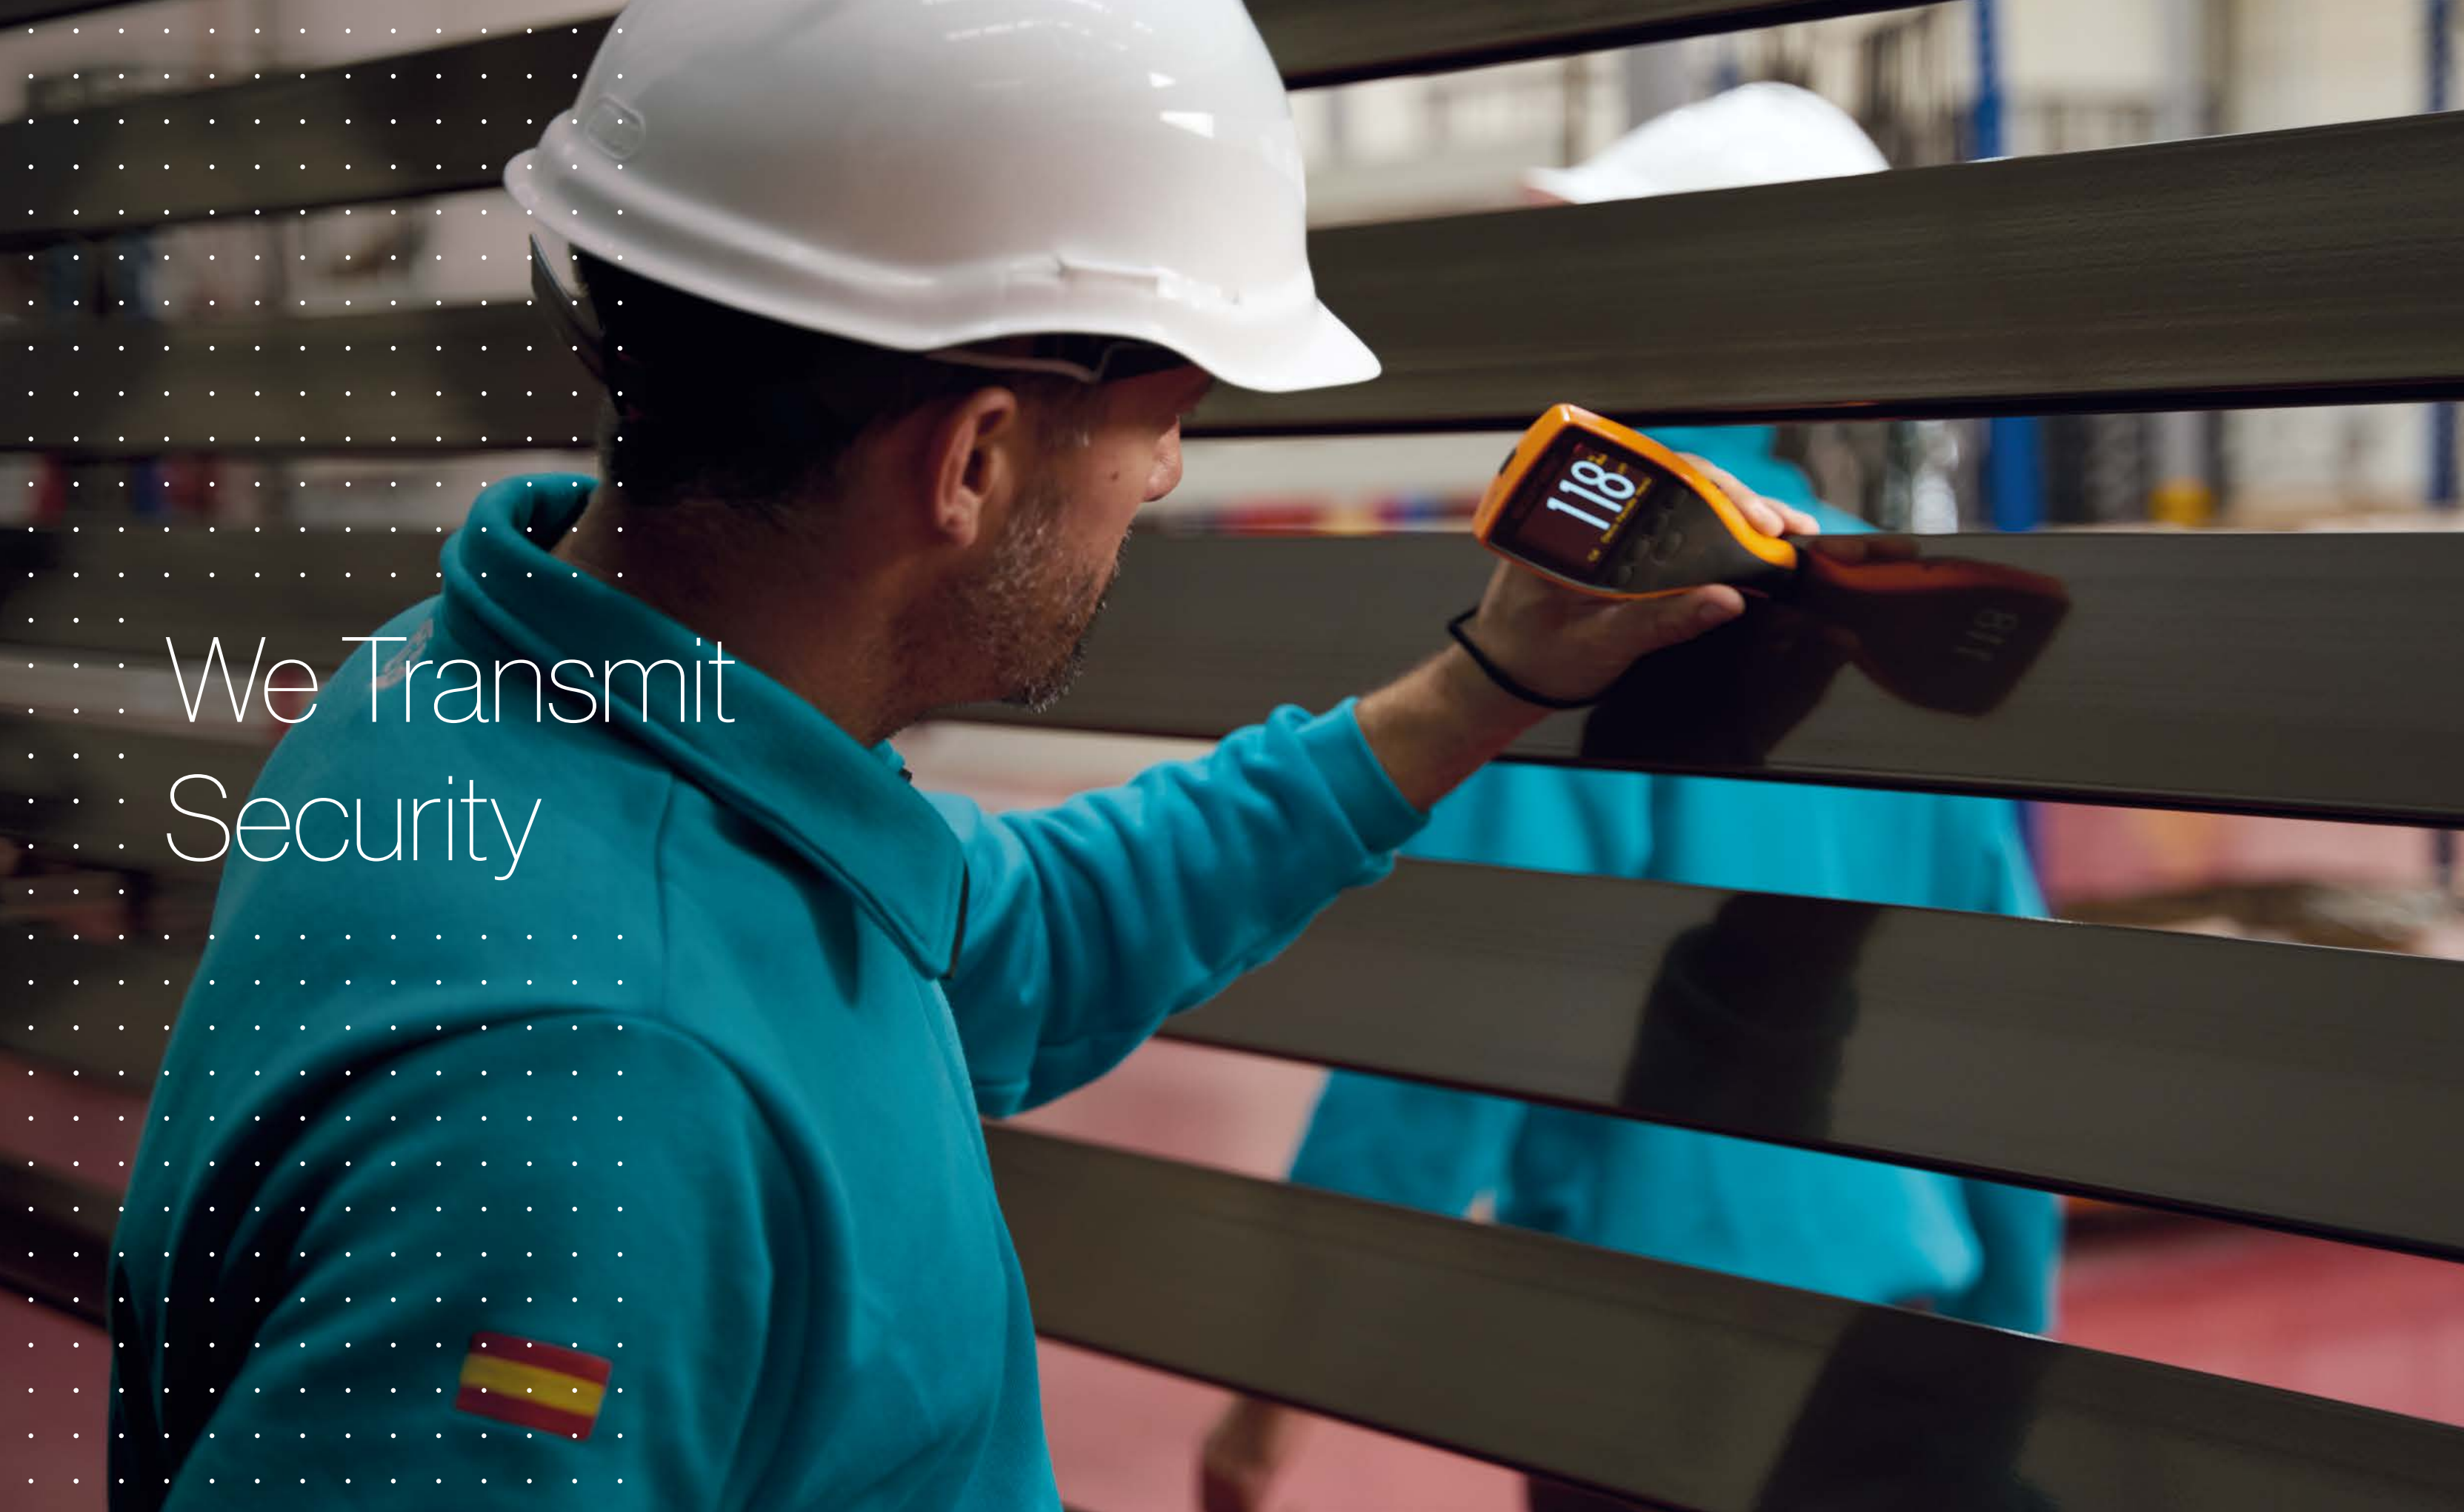

Glass  
Curtains

This fully glazed enclosure, with no vertical profiles, offers full transparency without affecting the aesthetics of the façade in any way and does not require any building work for its installation. It allows the luxury of being able to enjoy terraces and balconies all year round without worrying about the weather and is perfect for separating areas in offices, restaurants, clinics, etc. In short, it is a crystal-clear choice.

# Improving spaces for better living for more than 60 years

'59

Juan and Pedro, two brothers from Sájeda, carpenters by profession and heirs to the industrial tradition, founded a small carpentry workshop in the centre of the town, which they called Giménez Ganga.

'60

The personal effort and quality of their first products positioned Giménez Ganga as one of the leading companies in the Alicante area, where the construction sector was booming.

'70

A decade after the company was founded, everybody was already talking about us. The quality of what we do, as well as the fact that our distribution network was growing across Spain, made us a consolidated leader.

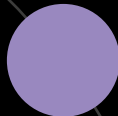

'80

Aluminium and other materials arrived and then everything changed. A new concept of rolling shutters was here to stay. Solid shutters were created and the sector underwent a new transformation, and we moved forward with it.

'90

We got a new home. With the nostalgia of leaving the place we started out, but delighted to know that we were growing, we moved to our current premises in the "El Castillo" Industrial Estate in Sax.

'00

Changing century implied changing many more things. We left the country to see the world. In 2006 Saxun was founded, a breath of fresh air for architects, designers and other construction professionals.

'10

It looks like we enjoyed discovering other countries: we reached 70 countries on all continents. Saxun led the manufacturing and distribution of Bioclimatic Pergolas, a new milestone in our history.

'21

Giménez Ganga became our corporate brand and we turned Saxun into our big commercial brand with the widest range of enclosures, solar protection and décor on the market.

# There Are Other Worlds, but They Are in This One

We have 23 distributors in 70 countries with whom we have been working hand in hand for some time now. 23 travelling companions with whom we continue to explore every day and enjoy an exciting journey, with no other goal in mind than to continue to be part of each of our customers' worlds.

Time is the most valuable thing we have. Having 4 branches and 16 production centres located across Spain allows us to be close to our customers when they need us. This is very important to us.

6\_If We Believe In Ourselves, We Can Achieve Anything

# R+D+A: A Unique Way of Understanding Innovation

Setting an example of what they do, our R+D+A department has taken innovation to the next level. That “A” stands for Application, something which is essential in our company when it comes to creating new, state-of-the-art solutions that improve people's lives and living spaces.

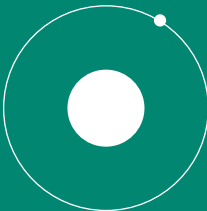

# We Are Committed to Sustainability

As a company, we strive to improve our habits and processes every day so that they are more and more environmentally friendly. We believe in a growth capable of combining ambition with reality and responsibility, using resources efficiently, committing to all those who have counted on us and who form part of the Giménez Ganga universe.

# We Live on a Wonderful Planet, Let's Make Sure It Stays That Way

It is possible to grow up respecting the environment around us, being aware of the great responsibility we have for the world we live in today and the world in which our children will live. We believe that energy efficiency is a fundamental criterion in the development of our products, both in the design of their functions and in the manufacturing process. Initiatives such as Zero Waste, with which we achieve a circular economy of the waste generated, or Zero Net Emissions, an objective we have been working towards for years, are helping us to become an increasingly sustainable and efficient company.

Giménez Ganga's green lung. The cultivation of different plant species is aimed at absorbing CO2 emissions to help offset our business activity. It serves for recreational and leisure use throughout the year, thanks to a rich and differentiated seasonal chromatic richness.

Self-consumption photovoltaic installation. This project represents a reduction of around 150 TN/CO2 per year (equivalent to 14,700 trees) and has a useful life of 25-30 years.

# As Long as Someone Needs Us, We Won't Close the Shutters

I Giménez Ganga Solidarity Week.  
I Am Maasai.

I Edition of Saxun Experiences with David Meca.

Being part of the society in which we live is something that defines us as people. We carry out some initiatives such as promoting the values of sport among young people, sponsoring the Saxun cycling team, which competes in the main Spanish national youth races, or organising the Saxun Villa de Sax Night Cross every year, a benchmark in the Valencian Community. We also do our bit in other areas such as culture and leisure, a commitment that makes us happy and brings us a little closer to people.

at the centre  
of everything in  
our universe

# The Universe We Believe In at Giménez Ganga

## We persevere with passion

Work, enthusiasm, commitment, honesty and the desire to better ourselves every day have meant that after 60 years, we continue to be close to so many people, families, businesses, companies and institutions. Our intention is to continue to do for many years to come.

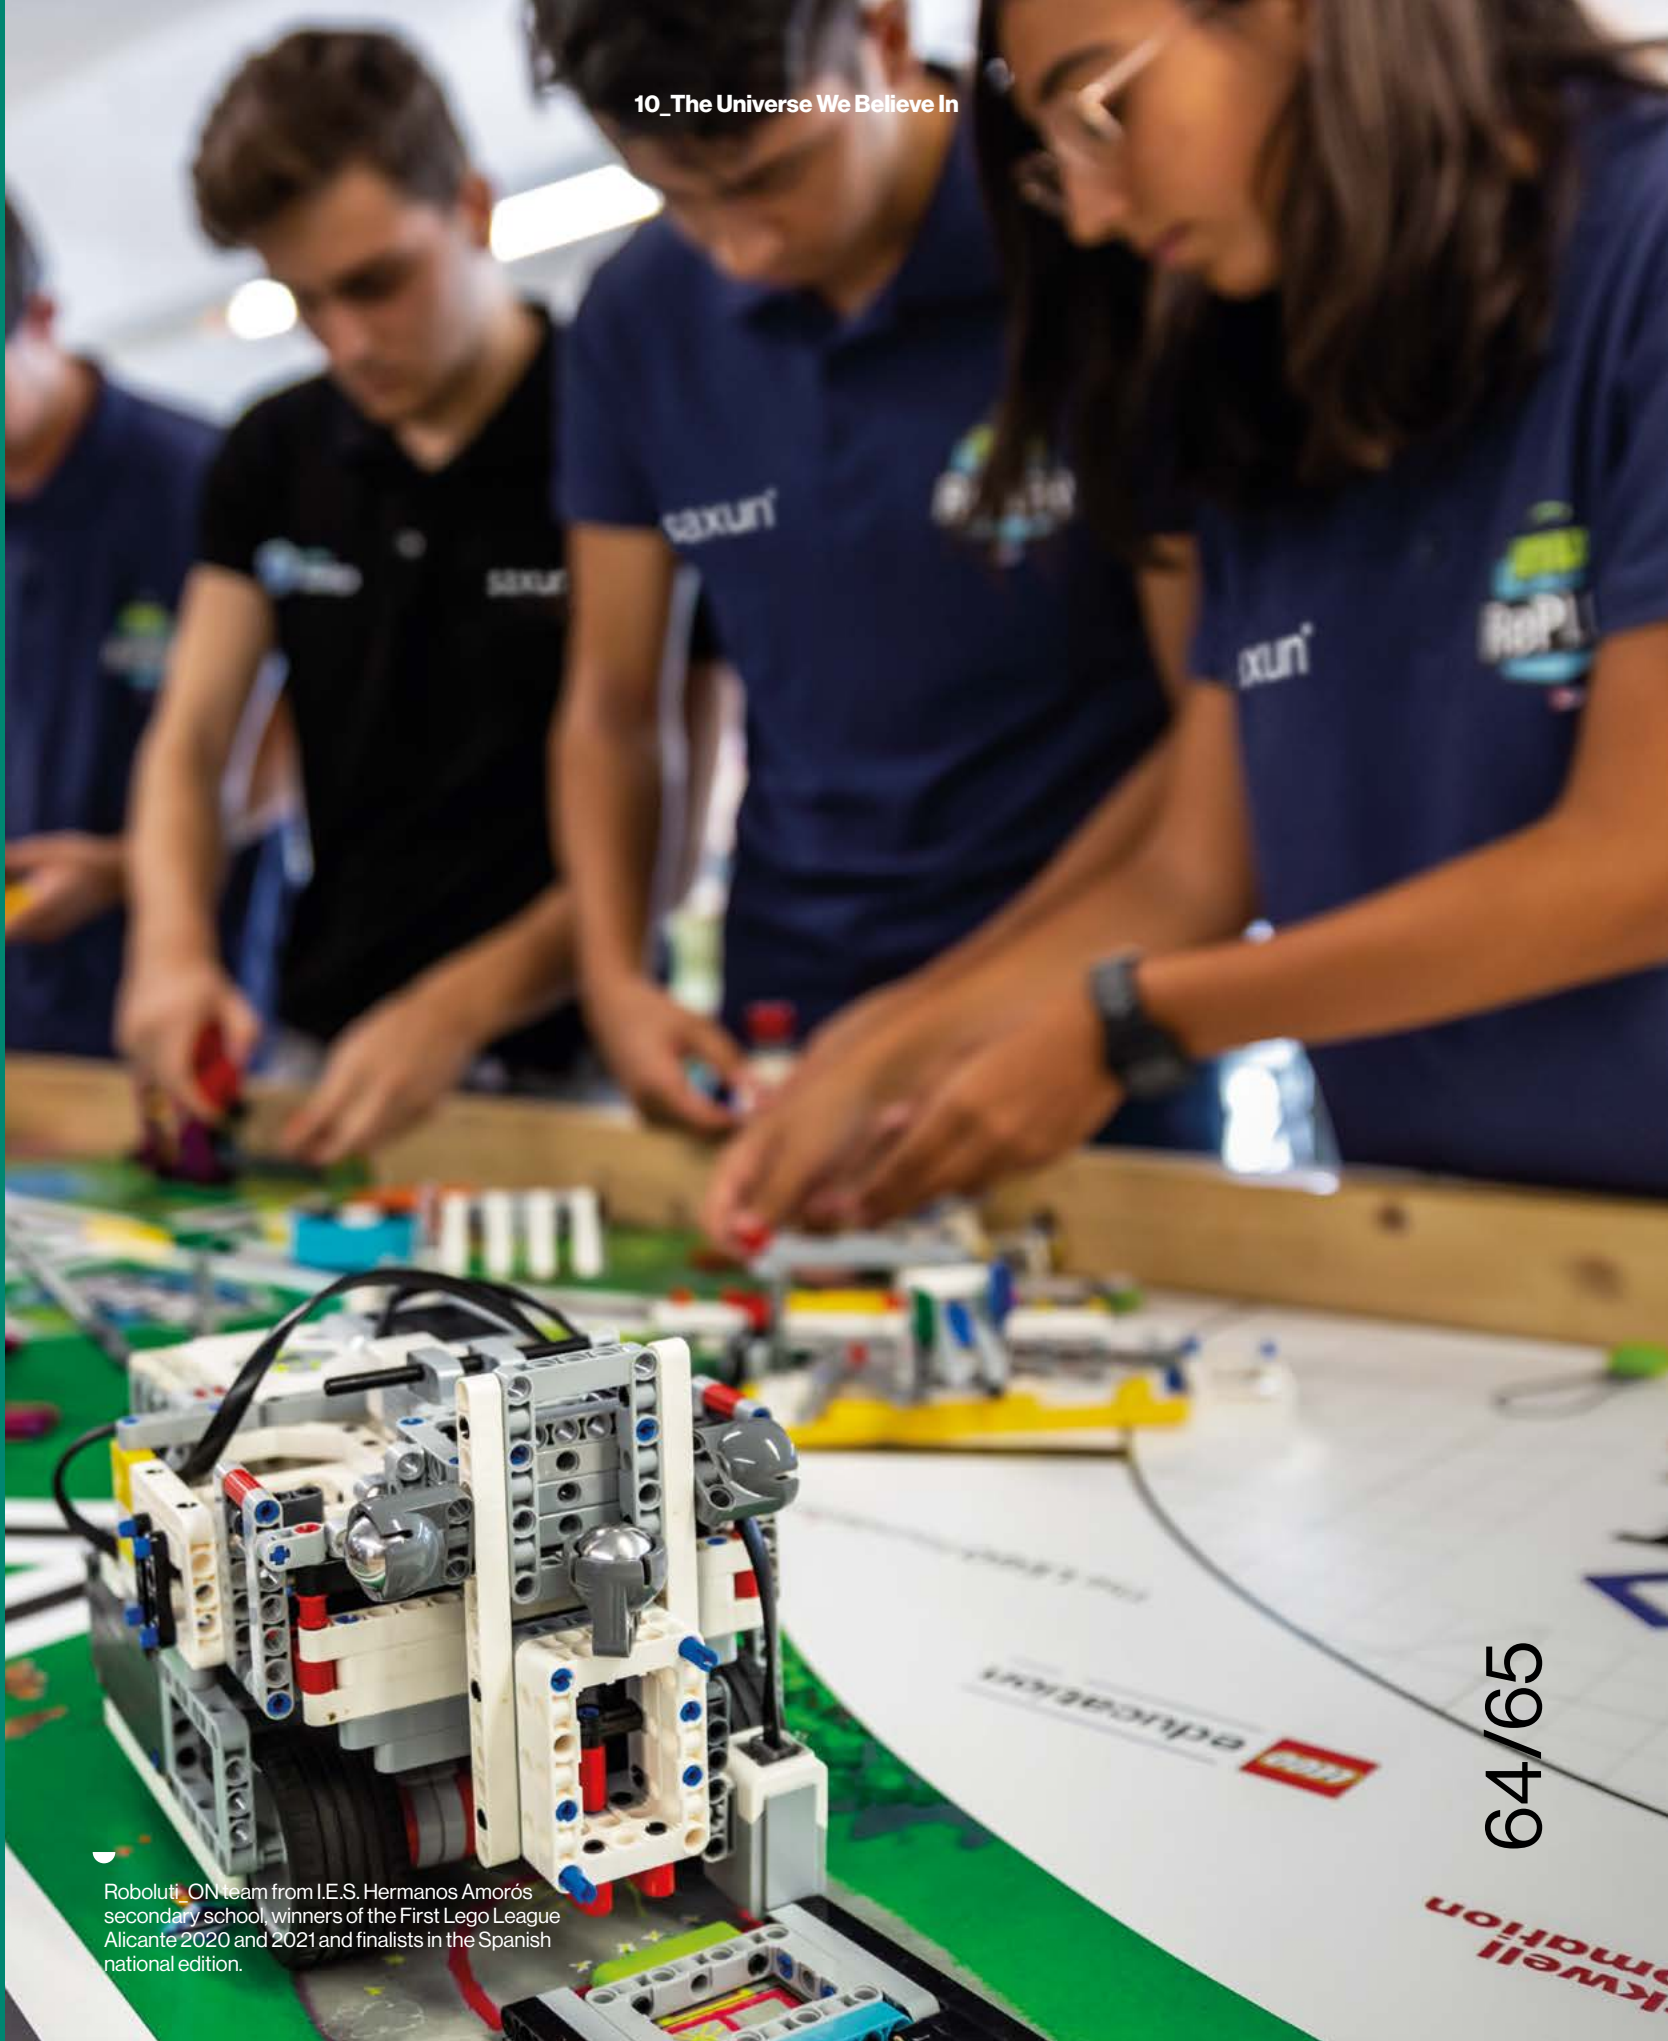

# We keep our promises

Those who know us know that they can always count on us, that we keep our promises, no matter what we say or how we say it. It is our way of showing respect for those who have counted on us, whether for a few hours or for years.

We engage with the community

When we talk about being close to the people we care about, sometimes we mean it literally. Knowing that we are contributing to the development of the land that we love and that has always been our home is hard to put into words.

10\_The Universe We Believe In

Pedro Giménez Ganga and Óscar Navarro at Giménez Ganga's 60th Anniversary Gala Dinner.

We build  
lasting  
relationships

Where we come from, we know the value of sowing today in order to reap the rewards tomorrow. And although the process is slow, we like it that way, because that is the only way that the relationship with our employees, customers, prescribers or suppliers will remain strong for generations to come.

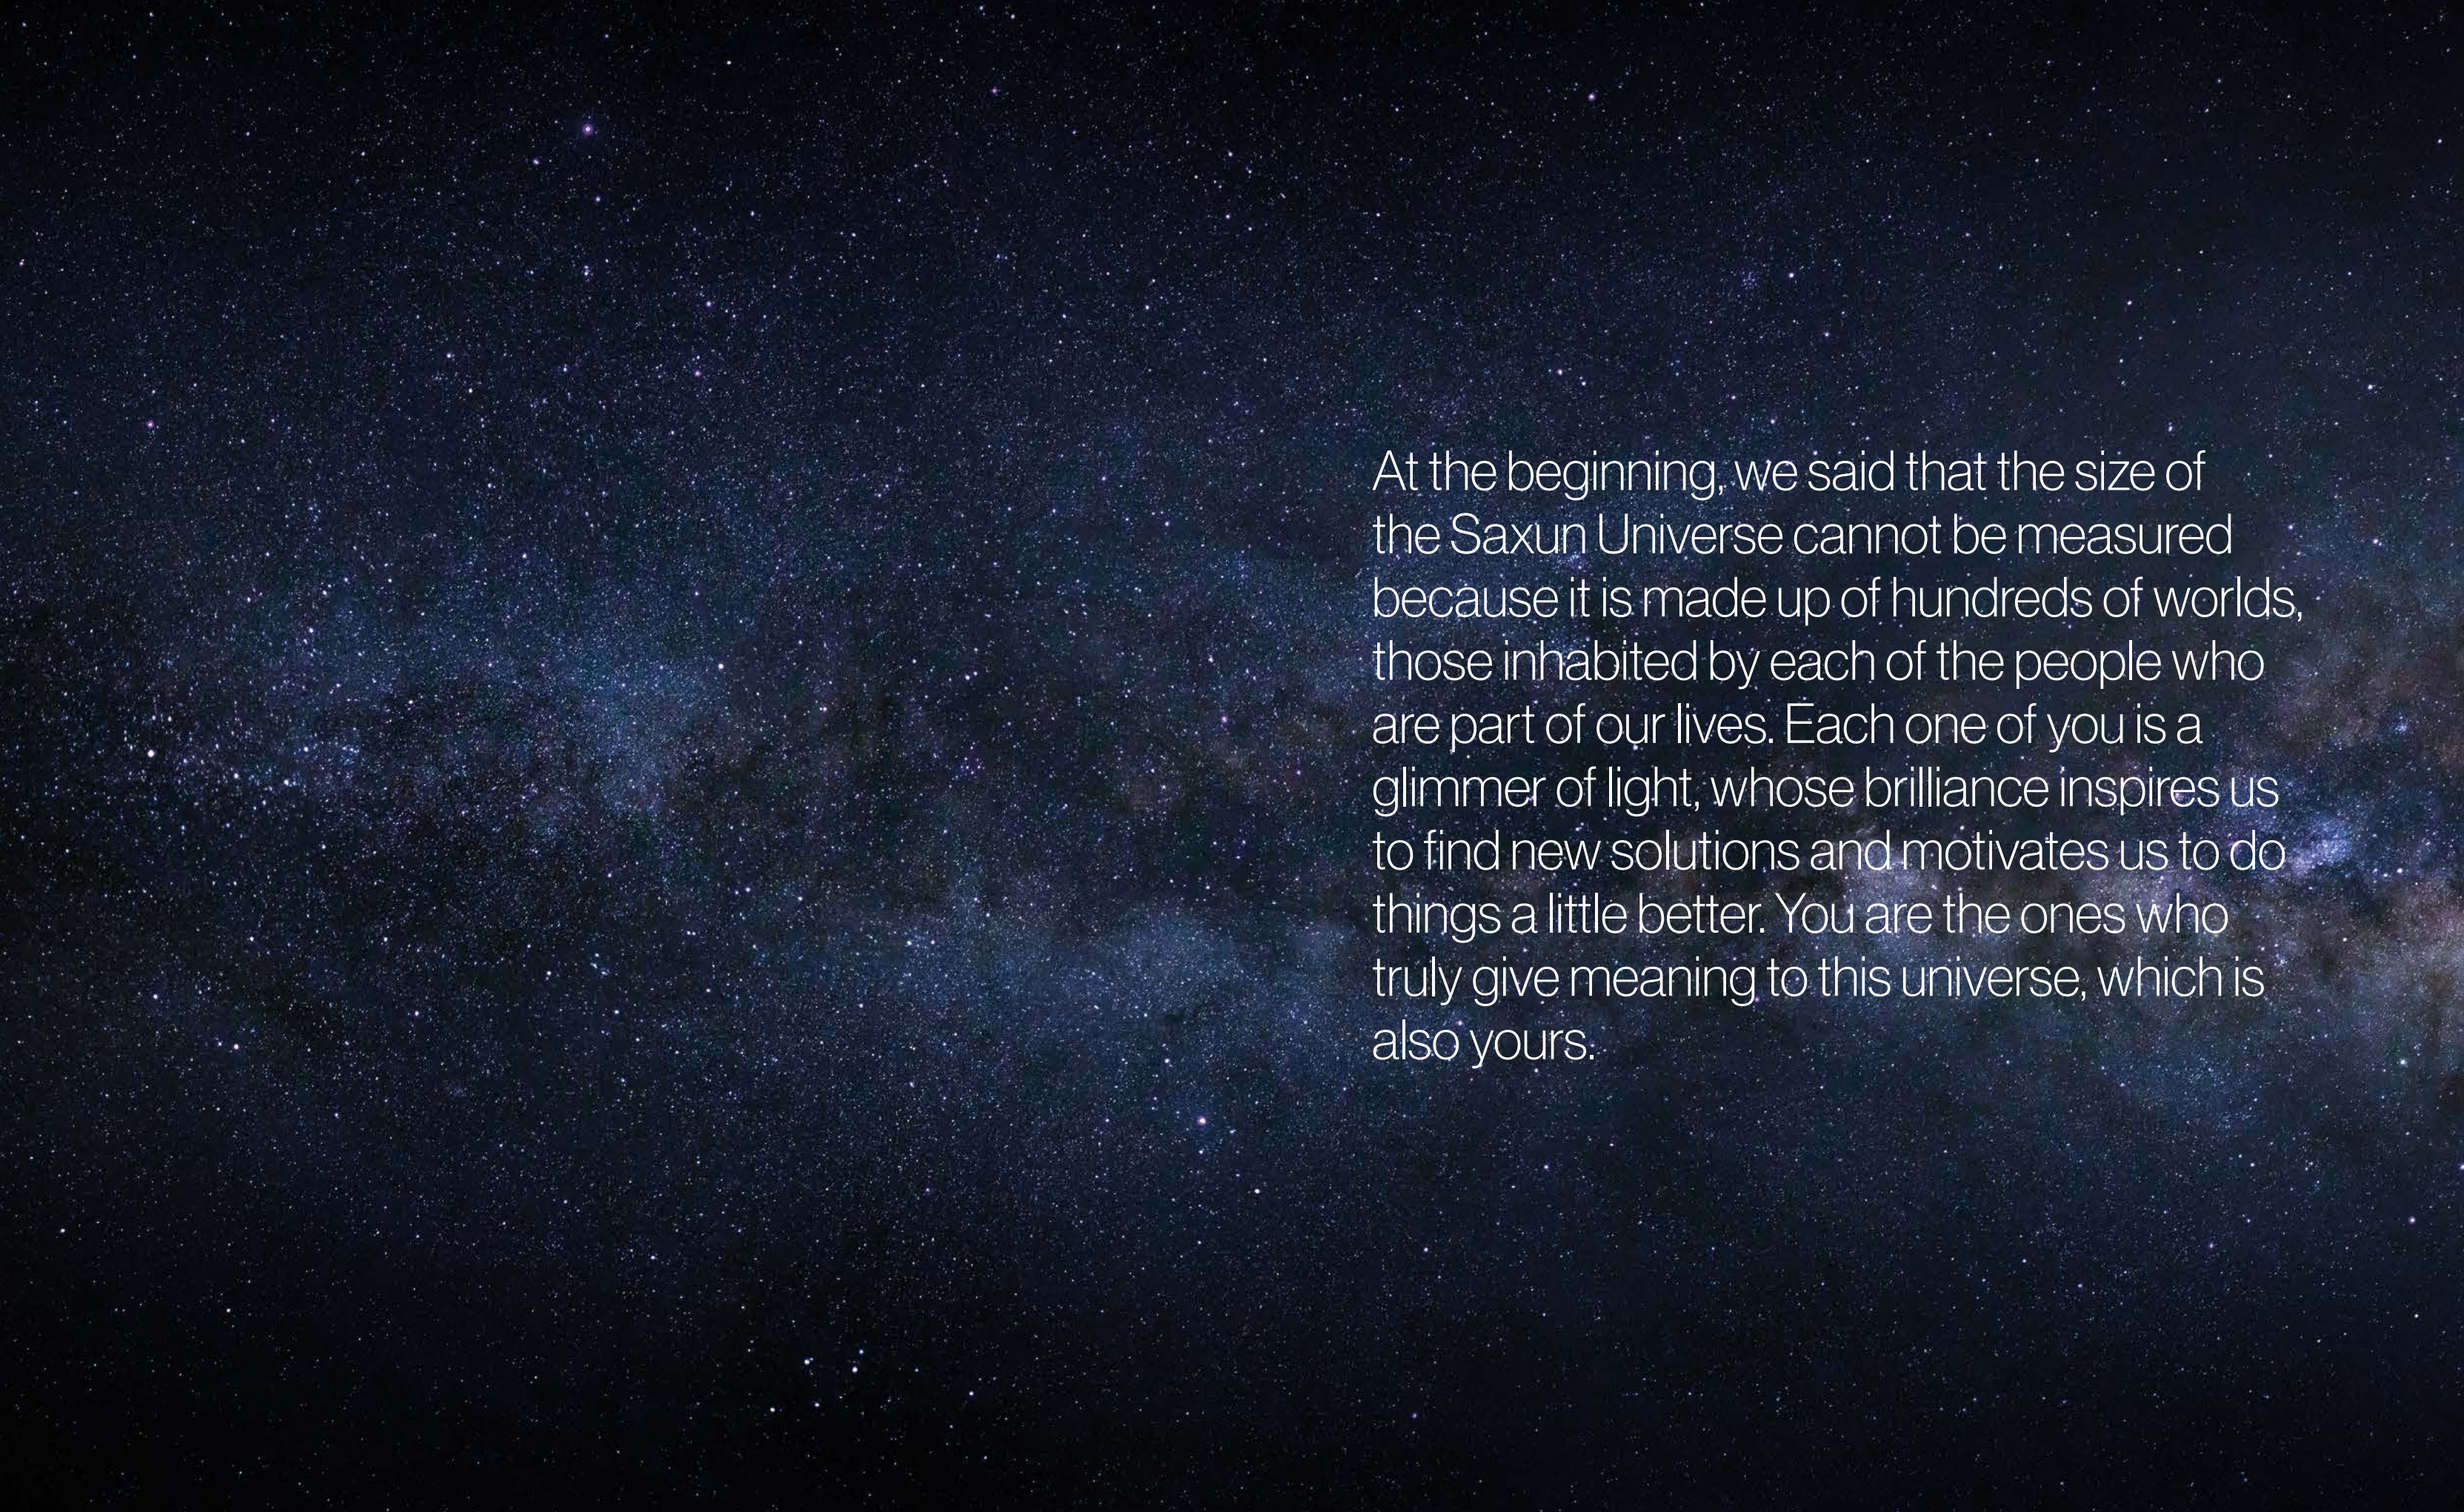

We are driven  
by a vocation  
to serve

We understand work as the result of the relationship between people. That is why we look after our collaborators on a daily basis by visiting them, listening to them, accompanying them, supporting them, offering them facilities and ensuring they receive the service they need so that their activity never ceases. They are our greatest allies and a fundamental part of our universe.

10\_ The Universe We Believe In

At the beginning, we said that the size of the Saxun Universe cannot be measured because it is made up of hundreds of worlds, those inhabited by each of the people who are part of our lives. Each one of you is a glimmer of light, whose brilliance inspires us to find new solutions and motivates us to do things a little better. You are the ones who truly give meaning to this universe, which is also yours.
